In Case of Emergency or to Report Fire: DIAL 911

"A Hike Through History"

The Ute Indian Trail is one of the oldest migratory routes in the United States, its use dating back to 10,000 years ago. Ute people used the trail to access rich hunting grounds in South Park, trade with other tribes, and for spiritual pilgrimages to the sacred Manitou springs, where the breath of the "Great Spirit" created bubbles and bestowed them with curing powers.
